

JLDZ-15W OUTDOOR SINGLE PHASE METERING KIT (COMBINED TYPE)

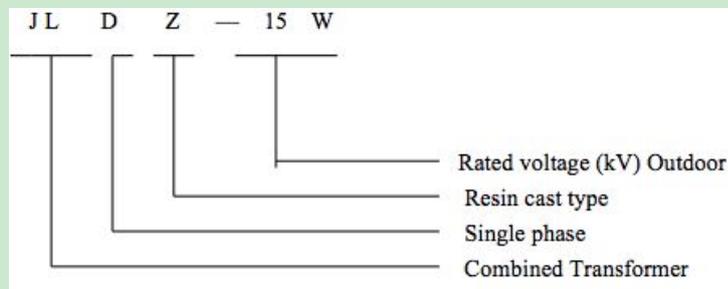

This combined transformer (Metering kit) which is combined by current transformer and potential transformer. It can measure the active and reactive electricity directly for the high voltage power line. It suits to the 50/60Hz electricity measurement for the active and reactive energy and relay protection. It can be used in the outdoor electric utility substation and power transformer substation, which can instead of the oil-immersed type combined transformer.

Application Standard: Instrument transformers - Part 1: Current transformers (IEC 60044-1:2002)

Instrument transformers - Part 2: Potential transformers (IEC 60044-3:2002)

Instrument transformers - Part 3: Combined transformers (IEC 60044-3:2002)

Description of product's type:

Ratio (A)	Class	Capacity	BIL	Tender No.
5-10/5	CT: 0.5 (IEC) PT: 0.5S (IEC)	CT: 12.5VA PT: 50VA	15/38/95kV	TMCMT-21B
10-20/5				TMCMT-21C
50-100/5				TMCMT-21E
